

Navigating the Internet

What is the Internet?

- A global network of computers, like a massive digital library.
- Used for accessing information, communication, shopping, videos, and more.

Importance of the Internet

- Provides instant access to information.
- Revolutionized communication, shopping, research, and innovation.

Accessing the Internet: Hardware

- Devices: laptop, tablet, smartphone.

Key Web Terms

- **Web Browser:** Tool to access websites (e.g., Chrome, Safari).
- **Search Engines:** Use to find websites and information (Google, Bing).

Navigating Websites

- **Website:** A digital collection of pages with specific information.
- **Tabs:** Like a book's table of contents to navigate categories.

Bookmarks/Favorites

- Save frequently visited sites by adding them to Favorites.
-

Internet Safety Tips

- Use secure websites (<https://>).
- Be cautious with unfamiliar links; avoid scams.
- Secure online payments using credit (not debit) cards.
- Be aware of phishing scams.
